Need / Problem: The La Mer coastal complex required attractive, durable children's play areas adapted to the maritime environment, capable of complementing its family leisure offerings.
Solution: Installation of children's play equipment from the REB and KLASIK collections, along with COMBO Swings and COSMIC dynamic elements.
Result: A varied and functional play space is created that promotes physical activity, creativity, and family interaction in a coastal environment.
At La Mer, located on the Jumeirah coast in Dubai (United Arab Emirates), BENITO URBAN has participated in the creation of a children's area integrated into this waterfront complex, renowned for combining contemporary architecture, public spaces, and leisure activities.
The intervention incorporates the REB 6 game, belonging to the line of games made with 100% recycled material, along with the KLASIK 6 set, offering different possibilities for exploration, movement and fun.
The area is completed with Swings COMBO 6 and the dynamic COSMIC game, which expand the play experiences and promote the development of motor skills.
The combination of these facilities creates an active and engaging play environment, tailored to the needs of families and the contemporary character of Dubai's waterfront.
This project combines design, functionality, and sustainability, with a particular emphasis on the use of recycled equipment in a coastal environment.

Al Gharrafa Park is located in an area f abot 50,000 m2, which makes it a good place for visistors, residents and tourists; especially this year that Qatar is hosting the FIFA World Cup in November.
It stands out for being the **first park in the world with air conditioning**, designed for recreational activities such as walking, exercising and cycling, becoming one of the first parks with such technology and with environmental awareness as it is operated by solar panels.
The Qatari Administration aims at promoting sports and healthy living as well as providing democratic and inclusive games for all children and communities living in the city.

Pedestrian tracks with A/C which allow visitors to walk during hot summer days.
As it is a family park, we can find:
1-**Two fitness areas** equipped with gym elements (Fitness Station Area 1 and Fitness Station Area 2)
2-**Two playground areas** divided according to age groups from 2 to 5 and from 6 to 12 years old.
Gyms are equipped with fitness equipment that people can use to keep fit. Playground areas are segregated accordifng to age groups and are designed for children up to 12 years old. Children with special needs are also considered in the design of the playground areas.
