Florence (Italy)

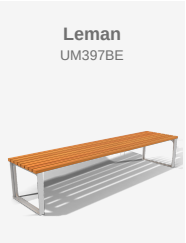
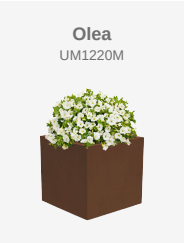
A new rest area has been installed in one of the squares in the center of Florence (Italy), equipped with Leman benches and Olea planters, thus improving the urban environment of the area.





A new design-oriented rest area has been created, using **Leman benches**, part of the **DESIGN+** collection, and **OLEA planters**, which combine perfectly, next to **Largo Pietro Annigoni**, in the center of **Florence**, Italy.

This space provides a comfortable and pleasant environment for both locals and tourists. The area features **Leman benches**, which offer modern and comfortable seating, ideal for resting while enjoying the surroundings. Additionally, the **OLEA planters** add a green, natural touch, creating a relaxing and harmonious atmosphere in the heart of the city. The combination of these elements not only enhances the functionality of the area but also highlights the aesthetic of the urban environment, seamlessly integrating with the historic landscape of **Florence**. With this renovation, **Largo Pietro Annigoni** has become a more welcoming and accessible place, inviting citizens and visitors to enjoy a break in a revitalized and modern setting.
