Need / Problem: The plaza required a new children's area that offered different play possibilities and adequate lighting to encourage the use of the public space.
Solution: Creation of a children's playground with the ALU 6 modular play structure, the Three-Dimensional Net CUAT, and Light Points CICLO.
Result: A dynamic, attractive, and functional children's space is created, which encourages movement, interaction, and family gatherings.
A new children's park has been created in Plaça Europa in Tàrrega (Lleida), designed to offer a space for play, activity, and meeting for children and their families.
BENITO URBAN's intervention incorporates the ALU 6 set, a modular structure that offers different possibilities for play and exploration, promoting the development of motor skills and interaction among young children.
The space is completed with the Three-Dimensional Net CUAT, which invites climbing, balance work, and overcoming new challenges, fostering coordination, autonomy, and active play.
The project also includes CICLO Light Points , which illuminate the surrounding area and improve visibility during off-peak hours, encouraging the use of the plaza.
The result is a new children's space that combines play, movement and lighting, transforming Plaça Europa into a meeting point for families in Tàrrega.

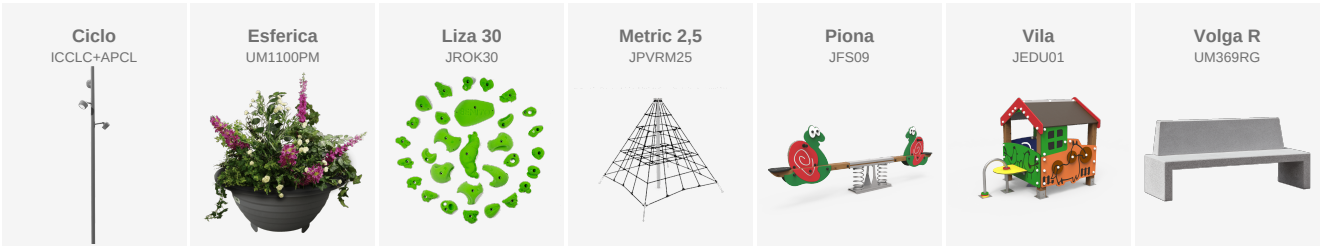
Tarragona (Spain)

Renovation of the Plaça de la Cinquena Promoció in Sant Pere i Sant Pau (Tarragona), featuring a new children's play area, rubber safety surfacing, ESFÉRICA planters and CICLO lighting.



Need / Problem: The square had fallen into significant disrepair and required refurbishment to improve safety, accessibility and overall urban quality.
Solution: Comprehensive redevelopment including a children's play area, pedestrian walkways, landscaped areas, planters and lighting.
Result: A renewed public space that enhances community life, play opportunities and residents' quality of life.
In the **Sant Pere i Sant Pau district of Tarragona,** the **Plaça de la Cinquena Promoció** has been completely renovated, transforming a deteriorated space into a more accessible, functional public area designed for people.
The project includes new pedestrian routes, landscaped areas and **ESFÉRICA planters** positioned alongside the pathways, bringing greenery, order and a more welcoming appearance to the urban environment.
The new children's playground features a variety of play elements for different age groups, including a **three-dimensional climbing net, the DERA slide with Liza climbing holds** used as access, **the Villa playhouse** for younger children, **the Piona seesaw and play tunnels integrated into the safety surfacing.** The entire play area is finished with continuous rubber safety surfacing, providing safety, comfort and a colourful, dynamic appearance.
The project is completed with **CICLO lighting,** improving visibility at night and encouraging safer use of the space after dark.

Barcelona (Spain)

Lighting upgrade at El Garraf marina with CICLO floodlights and TOMSK light points on black poles treated against marine corrosion.

The marina of El Garraf (Barcelona) has undergone a complete renovation of its outdoor lighting system, opting for more efficient, modern, and sustainable solutions. The old analogue luminaires, already deteriorated due to the passage of time and the harsh maritime conditions, have been replaced by **CICLO** floodlights from **Benito Urban**. These provide uniform and high-quality lighting after sunset, enhancing both safety and the visual appeal of the area. In the car parking area, **TOMSK** L-shaped light points have been installed, offering a functional and visually cohesive solution.
All the luminaires have been mounted on black columns, which feature an anti-salt treatment to resist corrosion and ensure long-lasting durability against the coastal climate. This renovation not only improves the experience of the port's users, but also reinforces the commitment to a safer, more resilient, and aesthetically refined urban environment.
