Barcelona has completely renovated the Olympic Port, transforming it for the celebration of the America's Cup sailing event. After a long construction process, the facilities, originally inaugurated in 1991 for the Olympic Games, have been redesigned to offer more than 20,000 square meters of public space, creating a smoother connection between the city and the Mediterranean.
This project includes elements from **Benito Urban's Kube collection**, used to separate vehicle and pedestrian zones. These traffic barriers are robust and weather-resistant, designed to withstand the harsh conditions of coastal environments, making them an ideal choice for seaside areas. Additionally, **Kube litter bins** have been installed, sharing the same resistance and durability properties, ensuring high-quality urban furniture with low maintenance.
This project not only enhances the port's infrastructure but also offers citizens an open, modern, and accessible space.

The Rosa Center Mall of Playa Paraíso stands out for its modern design with big terraces and spectacular views of the sea and La Gomera island.

Besides being a space for leisure, gastronomy and sports, this mall is intended as a meeting place for thousands of people. The choice of the furniture was therefore essential.

The **Kube range**, whose products are made of concrete, was chosen since it combines perfectly with the aesthetic of the infrastructure.

The mall also for planters of different dimensions to add vegetation and refresh the environment, and selective bins to promote recycling and environmental respect.
