

A secure, customised bicycle rack in a car park in
Valladolid city centre

Arvelo
VBF06

The Valladolid city council has relied on BENITO's know-how to install a secure parking facility for bicycles in the underground car park in the main square.

The result is a transparent box operated through a mobile application, also developed by BENITO..

The constant improvement and evolution of our products may result in some modifications of the technical specifications and characteristics of the products without prior notice.
