In the town of Polinyà, in the province of Barcelona, a significant expansion of the Municipal Cemetery has been carried out to improve its functionality and aesthetics.

In this project, **Milan Solar lighting** has been installed, integrating a solar panel, battery, and control system within the structure itself, providing an efficient and sustainable lighting solution. Additionally, the new urban furniture has been carefully selected to harmonize with the surroundings. **Volga benches**, with wooden slats, offer a welcoming space for rest, while **Citizen M bins** make cleaning and maintenance easier.

This combination of elements creates a space where elegance and harmony blend together, offering visitors a calm and welcoming environment where they can feel comfortable and at peace.

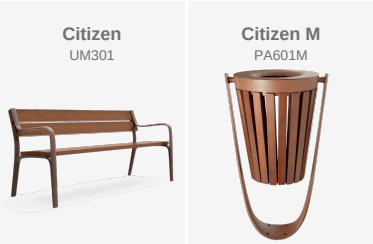
Kfar Saba (Israel)

Kfar Saba, a city located in the Central District of Israel, has installed BENITO benches and bins on its main avenue with the aim of considerably improving the street furniture of the area.



Kfar Saba is a city located in the Central Distrct of Israel, near the so-called Green Line, which separates the Israelian territory from the one claimed by Palestine.

To furnish its main avenue, the city has chosen some of BENITO's most popular design products: the **Citizen bench and bin**, designed by Eugeni Quitllet, and the **Oslo bench**, entirely created by the Group.

These are contemporary, comfortable elements with a minimalist aesthetic, which perfectly combine with urban environments.
