# Occitanie (France)

Complete renovation of urban lighting in Lavaur, Occitanie (France), with 105 Fusion M luminaires, improving energy efficiency, lighting quality and public space modernisation.

**Need / Issue:** The municipality needed to modernise its lighting system to improve energy efficiency and lighting quality in public spaces.
**Solution:** Replacement of the existing lighting with 105 Fusion M luminaires.
**Result:** Energy consumption is optimised while improving urban lighting and environmental perception.

In Lavaur, **in the Occitanie region (France),** a complete renovation of the urban lighting system has been carried out through **the installation of more than 100 Fusion M luminaires.**
These road luminaires stand out **for their functional and aerodynamic design,** specially developed for urban environments. Their geometry increases thermal dissipation surface, enabling high lighting performance and greater energy efficiency while maintaining a contemporary and discreet image within public spaces.
The new installation improves lighting uniformity and visibility in streets and pedestrian areas, providing an efficient solution adapted to the city's current needs.
The intervention will also allow a significant reduction in energy consumption and maintenance costs, contributing to more sustainable and efficient management of municipal lighting.
