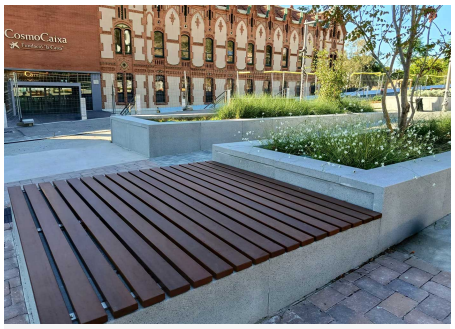
Some of the projects we have done



Wooden decking has been installed outside CosmoCaixa, while the interior now features PIK picnic tables in ReBnew, ReBnew planters, and PICCO four-compartment bins to ensure efficient recycling.

Barcelona (Spain)

Installation in Barcelona, near the port, with picnic tables, planters, and GEA litter bins made of ReBnew material, resistant to coastal corrosion.

Barcelona (Spain)

Planters by ReBnew for the Arenal Yacht Club, in Llucmajor, in Mallorca's island

Outside the **CosmoCaixa in Barcelona**, one of Europe's leading science museums and a benchmark in scientific outreach promoted by the "la Caixa" Foundation, a public-space upgrade has been carried out to enhance visitor comfort. The exterior area now includes **wooden-slat decking**, creating generous and comfortable spaces where visitors can rest, wait or enjoy the landscaped surroundings.

Inside the facility, functionality and sustainability have been strengthened with the installation of **PIK picnic tables made from ReBnew**, a highly resistant recycled material. These are complemented by **ReBnew planters**, which organise and green the communal areas, and by **PICCO bins with four compartments**, designed to facilitate efficient waste separation and encourage responsible recycling habits among visitors. This intervention improves both user comfort and environmental management within the museum.

The S'Arenal Yacht Club in Llucmajor a offers activities in the nautical and sporting world. It is committed to sustainability and, in this sense, has installed several single and double planters made of BENITO's ReBnew material.

This is why they have opted for a recycled and recyclable plastic that does not need maintenance and withstands the harsh conditions of a port, by the sea and the salinity of the water. They are large capacity planters for trees and large plants.
