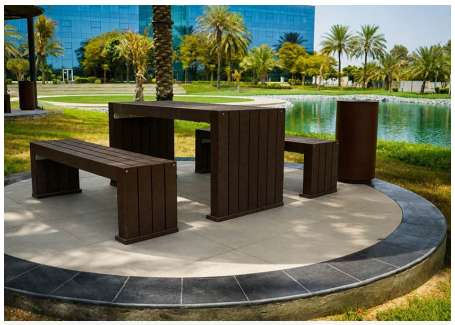
Some of the projects we have done

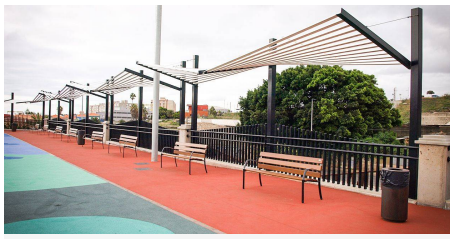


Street Furniture intervention at DIC International HQ, Dubai, with Tables KUK, Benches Quatro and Litter Bins Olea to create functional and comfortable outdoor spaces.

Dubai International City

The Elche bus interchange incorporates Riga benches from the Benito DESIGN+ collection, modular pieces with versatile design that allow the creation of linear, curved, or fully circular configurations.

Alicante (Spain)



The Canary Islands installed a large variety of BENITO products in one of the parks to create rest areas and ensure the correct lighting of the place.

Need / Problem: The exterior environment of DIC International HQ required Street Furniture that would favor the stay, rest and daily use of the common spaces.
Solution: Installation of KUK Tables , Quatro Benches and Olea Litter Bins , combining functionality, design and outdoor resistance.
Result: More comfortable, organized areas are created, better prepared for meetings, relaxation, and interaction within the corporate environment.
At **DIC International HQ** in Dubai, a Street Furniture intervention has been carried out to improve the quality of the outdoor spaces and enhance the daily use of this business and technology environment.
The project incorporates **KUK** Tables , designed to create meeting points, rest areas, or informal outdoor workspaces, along with **Quatro** Benches , which offer comfortable and versatile seating areas. The ensemble is completed with **Olea** Litter Bins , which contribute to the maintenance of the space and reinforce a well-maintained urban image.
The combination of these elements allows for the creation of more functional, organized, and pleasant outdoor areas for workers, visitors, and users of the complex.
The result is a more livable outdoor space, where design, comfort and functionality are integrated into a contemporary corporate environment.

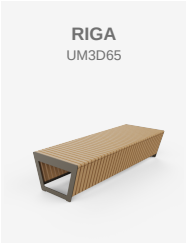
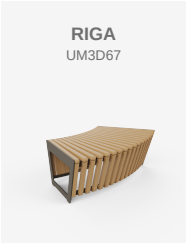
Alicante (Spain)

The Elche bus interchange incorporates Riga benches from the Benito DESIGN+ collection, modular pieces with versatile design that allow the creation of linear, curved, or fully circular configurations.





The **new bus interchange in Elche,** in the province of Alicante, opts for contemporary and functional urban furniture with the **installation of Riga benches from the Benito DESIGN+ collection and the OLEA bin in corten steel finish. This bench model** stands out for its modular concept and elegant aesthetics, which allow comfort and versatility to be combined in high-traffic public spaces.

The **long Riga bench** offers linear solutions to organize waiting areas, while the **curved Riga bench** makes it possible to configure enveloping and dynamic shapes. Thanks to their full compatibility, both models can be easily integrated, creating furniture systems that adapt to the different needs of the urban environment. One of their most distinctive applications is the creation of fully circular benches, encouraging social interaction and collective rest.

With this choice, Elche reaffirms its **commitment to a more welcoming, innovative, and sustainable public space, in addition to a spectacular installation.**
