Luminaires with remote management system in the Tamarit Beach Resort campsite in Tarragona.

Nordic luminaires with brackets of the same series and Essentials poles have been installed by BENITO at the Tamarit campsite, next to Altafulla, in Tarragona. Tamarit Beach Resort is one of the best-equipped campsites in the area and has a wide variety of services, including bike rental, laundry facilities, and various sports activities.

The Nordic luminaire has an elegant and contemporary design and is conceived for residential applications. It fits perfectly in a high-end camping site like the one in Tamarit. All luminaires have been installed with the remote management system, which allows for energy and cost savings as they can function with more or less power depending on the capacity of the campsite.
