Le Brasilia (France)

Le Brasilia campsite has installed rustic urban furniture made of wood and corten steel, along with St-André barriers, enhancing both safety and the natural surroundings' visual appeal.

Yelloh! Village Le Brasilia campsite, located in **Canet-en-Roussillon,** has enhanced its outdoor spaces with the installation of new urban furniture. The campsite has opted for a rustic and natural style that blends harmoniously with its surroundings. To achieve this, they have **combined Gavarres benches with Tor benches and Tor litter bins,** all made from treated pine wood and corten steel – a combination that fits beautifully into the site's green areas.
In addition, to improve safety at the campsite entrance, a fence composed of **St-André barriers in a mars brown finish** has been installed. These barriers not only separate pedestrian and vehicle areas, but have also been decorated with planters on top, adding a floral and aesthetic touch to the main entrance. A clear commitment to functional design and landscape integration in a privileged natural environment.

Occitanie (France)

Installation of a concrete Petrus bollard in front of a pharmacy in the city of Salses le Chateau, France, along with a Tor trash can made of wood and corten steel.

In Salses le Chateau, France, the Petrus bollard has been installed at the entrance of a pharmacy for security purposes. This bollard is made of prefabricated reinforced concrete with a fine stripped finish and is designed to permanently prevent vehicle access, thus ensuring the safety of the area.
Its top finish, crowned with a brushed stainless steel plate, adds a touch of elegance and durability to the structure. Additionally, this bollard offers an optional feature that distinguishes it even further: a LED light crown. With its red/green LED crown, this traffic light function ensures maximum visibility at any time of day or night.
Next to the bollard is the Tor litter bin, made of wood and corten steel, which perfectly complements the style and elegance of the surroundings. This litter bin not only serves a practical function by providing a place to dispose of waste in an orderly manner but also adds a design element that harmonizes with the overall aesthetic of the location.
With the installation of the Petrus bollard and the Tor litter bin, BENITO once again demonstrates its commitment to quality and exceptional design in BENITO's urban furniture.
