?ód? (Poland)

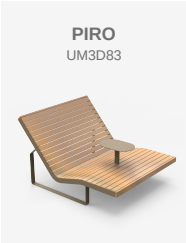
Double PIRO loungers from the Benito Design+ collection transform a residential area in ?ód? (Poland) into a green, comfortable space designed for shared relaxation.



In this **residential area of ?ód? (Poland), the incorporation of double PIRO loungers from the Benito Design+ collection** redefines the shared space as a more comfortable environment connected to the landscape.
Designed **for two people and featuring an integrated central table,** these pieces encourage shared relaxation and neighbourly interaction in a calm setting. Their **green finish** enhances integration with existing vegetation, reinforcing a natural atmosphere consistent with the landscaped surroundings.
The seating areas are strategically positioned among planting zones, creating small pockets of greater privacy that provide tranquillity while maintaining the communal character of the space. This layout balances intimacy and social interaction, enriching residents' daily experience.
With a contemporary design and materials specifically developed for outdoor use, **the Benito Design+ collection** ensures durability, low maintenance, and aesthetic quality. The result is a space where residential architecture extends into the landscape, inviting people to pause, disconnect, and enjoy the shared environment in greater comfort.
