Some of the projects we have done

In Florence, a playground made of Robinia wood has been installed, integrated into a green environment, durable, maintenance-free, and featuring a variety of games.

Florence (Italy)

The Bassa dels Hermanos Park in Vic has installed playground elements made of robinia, thus combining modernity, tradition and one of the most resistant woods.

Vic (Spain)

In **the Ponte a Greve Garden, in Florence, Italy,** a **new playground has been installed, built with Robinia wood.** This type of wood stands out for its high resistance and durability, as well as being maintenance-free, making it an ideal option for public spaces.
The park has been designed to naturally integrate into the surrounding green environment, respecting the landscape and providing a welcoming space for play and social interaction.
Among the elements that make up the park are a large modular play structure allowing for multiple activities, a balance game that stimulates motor coordination, a spring rocker for younger children, classic swings, and an interactive musical panel that invites creativity.
This installation represents a commitment to outdoor, sustainable, and accessible play, encouraging children's interaction with nature and with other kids from the neighborhood.

Vic, located in the province of Barcelona, has installed an impressive playground area made of robinia to stimulate children's imagination.
Robinia playground areas are very appreciated by lovers of natural materials, which gain value over time.
A ship, spring swings, balance elements, swings… Small children have a new area to play!

These elements are ideal for those who think that pedagogy goes beyond play, who want their children to learn the importance of nature and that imperfection is often related to authenticity, but also who wish to add an artisanal touch to their projects.
The area has been completed with Citizen and Kube Kurve benches.
