In this new play area, located in a residential zone of Vilafranca del Penedès, in the province of Barcelona, a comprehensive intervention has been carried out with the aim of offering a safe, attractive, and functional space for children and their families. Among the installed elements are the Piona seesaw, the modular play structure Klasik 5, which allows for multiple activities and encourages group play, and a wooden nest swing, perfect for enjoying both individually or in a group.

The area is complemented by urban furniture that enhances both the design and functionality of the surroundings. Tomsk bollards have been installed for efficient and safe lighting, PETRUS planters that bring greenery into the urban space, and Kube and Kube Plus benches that combine comfort with a contemporary aesthetic. Altogether, this contributes to creating a welcoming, accessible space adapted to the needs of its users.

The municipality of Rubí, located between Terrassa and Sant Cugat del Vallès, has created a new playground area.

The City Council opted for the **Klasik 5 modular set** with two slides united by a bridge, the **Piona double seesaw** and several swings among which we can find one with a **Nest inclusive seat**.

Barcino benches were also installed for adults to take a break while children are playing.
