Need / Problem: The space required a complete, safe and attractive children's area, integrated into a city that promotes urban re-naturalization and outdoor living.
Solution: Installation of children's play equipment, sustainable Street Furniture , Litter Bins and lighting to create a functional and accessible environment.
Result: A more active, comfortable space for play, meeting, and leisure is created, connected to Viladecans' green city model.
In Viladecans (Barcelona), BENITO URBAN has participated in the creation of a new children's play and recreation area, incorporating solutions designed to encourage play, social interaction, and the everyday use of public space.
The play area integrates a Three-Dimensional Net **CUAT** , along with games from the **BERNA** line such as **Sauda** , **Forde,** and **Ornes** , offering different routes, motor challenges, and play experiences adapted to different ages.
The installation is completed with **Citizen ECO** Benches , made from recycled and recyclable materials, and **GEA** Litter Bins , which help keep the space clean and tidy. In addition, the installation incorporates **Milan S** Floodlights , improving illumination and promoting safer use during periods of low light.
A project that combines play, sustainability, comfort, and lighting to enhance the quality of public space and support Viladecans' commitment to a greener and more livable city.
