Some of the projects we have done

Renovation of the church square in Los Silos featuring Kube Plus benches and chairs, NER planters and Trajana bollards, integrating durable design within a historic setting.

Tenerife (Spain)

The El Llano square in Alcalá and the maritime promenade of Playa de San Juan have new benches and bins.

Tenerife (Spain)

Kube benches and chairs made with concrete and natural tropical wood boards installed in several parts of the municipality for neighbours to have a meeting place.

Calldetenes (Spain)

Installation of benches, chairs and bins in the municipality of Marchtrenk, in Austria. These products stand out for their resistance as they are made of concrete.

Marchtrenk (Austria)

In the town of Los Silos, located on the eastern side of Tenerife, a public-space enhancement has been carried out in the church square, next to the historic San Sebastián Ex-Convent, a former monastic centre and a key heritage landmark of the municipality. The intervention incorporates various urban elements from the BENITO URBAN range, selected for their durability, contemporary aesthetics and seamless integration within this culturally significant environment.

Kube Plus benches and chairs have been installed, made from granite-grey concrete and finished with natural-tone hardwood slats, providing comfort and resistance to the coastal climate. The renovation is completed with low-maintenance NER planters in corten steel, adding texture and character, along with Trajana bollards designed to demarcate the square and prevent vehicle access, improving safety and preserving the pedestrian nature of the space.

Tenerife (Spain)

The El Llano square in Alcalá and the maritime promenade of Playa de San Juan have new benches and bins.

Guía de Isora is a municipality located in southwestern Tenerife. It presents a great natural wealth since a part of it belongs to the Corona Forestal Natural Park and another one to the Teide National Park.

It consists of 17 urban nuclei among which we can find Alcalá and San Juan, which already have new **BENITO benches and bins made of concrete**.

These products are resistant to high levels of salinity so they will increase the comfort of the inhabitants and tourists of El Llano square and the maritime promenade of Playa de San Juan.

This project is part of the recent renovation of street furniture carried out by Guía de Isora in the areas close to the coast.

The goal of the project was to create a unique space with a lot of personality, accessible and integrated in the urban environment; a vast green and pedestrian area designed for the citizens. This was achieved by installing urban furniture which, thanks to its arrangement, is an invitation to rest and socialise, made with modern elements, simple lines, and an efficient and sustainable high-quality material.

For this project, the Kube collection was chosen. It is made with precast textured granite grey concrete, with natural tropical wood boards that guarantee a comfortable sit.
