BENITO
–Playground Equipment

Lanzarote (Spain)

New park in Playa Honda (Lanzarote) promoting active lifestyles, featuring sports areas, robinia playground equipment, a skate park, and bicycle racks, enhancing the use of public space.

In the town of Playa Honda, **on the island of Lanzarote,** a new park has been inaugurated next to the airport, designed to enhance the use of public space and promote outdoor living.
The project integrates different areas designed for all ages. It includes **fitness-oriented elements** that encourage active lifestyles, **as well as children's play areas with robinia wood structures** that blend naturally into the surroundings. In addition, the **park features a LETO modular play unit,** expanding recreational opportunities for younger users.
The intervention is completed with a large skate park area, creating a dynamic meeting point for young people and sports users.
All areas are equipped with OMEGA bike racks, facilitating sustainable access and promoting cycling.
A project that combines sport, play and urban design to create a versatile, accessible space adapted to the needs of the community.

In Dubai (United Arab Emirates), various initiatives have been launched to promote an active and healthy outdoor lifestyle. **A wide range of sports equipment has been introduced in public spaces**, including elliptical machines, chest presses, exercise bars, rowing machines, pulleys, and more. These areas are designed for outdoor sports and physical exercise.
In order to protect users from the scorching heat that characterizes the summer months in Dubai, these spaces have been covered with **geovelas** provided by Benito Urban. These structures not only provide shade and protection against intense solar radiation, but also contribute to creating more comfortable and attractive outdoor environments for physical activity and general well-being.
In addition to these facilities for adults, a playground has also been opened as part of the **LETO collection**, accompanied by the impressive **RED CUAT structure**, spanning over 50 square meters. Furthermore, this playground is equipped with swings, seesaws, and other games for the entertainment of younger children. Like in the adult areas, geovelas are also present in the playground to protect children from the heat while they enjoy their outdoor activities.
