Some of the projects we have done

Pedestrianisation of Portalet in Vic, transformed into a seating space with ARQ benches, TOMSK lighting and RGBW projection to enhance the historic surroundings.

Barcelona (Spain)

Renovation of the square in Sallent de Gállego (Huesca), transformed into an integrated pedestrian space with new lighting, urban furniture and seating areas.

Huesca (Spain)

The City Council of Vic has carried out an initiative to improve the urban space in the city. Recently, ARQ wooden benches have been installed, specifically designed to provide comfort to the residents and visitors of the city.

Need / Issue: The presence of vehicles limited pedestrian use and the quality of the urban space.
Solution: Pedestrianisation and incorporation of urban furniture and architectural lighting.
Result: A more accessible, organised environment focused on public enjoyment is created.

Portalet in Vic (Barcelona) has been renovated to become a fully pedestrian space, designed for both rest and movement of residents and visitors.
The intervention includes **ARQ benches,** a model already present in other parts of the city such as the entrance to Plaça Major, becoming a characteristic feature of Vic. Their straight, geometric and elegant design, available with and without backrests, encourages both use and integration within the historic setting.
The space is completed with the installation of an **Atlas fountain** and **INOX litter bins,** adding functionality and coherence.
Lighting plays a key role with **TOMSK luminaires** for pedestrian circulation and **Milan RGBW projectors,** which enhance the city walls on special occasions.
An intervention that returns the space to people and enhances urban heritage.

Need / Issue: The space did not encourage pedestrian use or stay, limiting its potential as a meeting point.
Solution: Pedestrianisation and incorporation of lighting, furniture, and spatial organisation elements.
Result: A more accessible, organised square focused on public use is created.

In **Sallent de Gállego (Huesca),** the town square has been renovated, transforming it into a space designed for people and everyday use. The intervention **includes TOMSK light points in L and T configurations,** ensuring efficient lighting integrated into the surroundings. The space is equipped **with ARQ benches,** with and without backrests, allowing different ways of use and stay.
In addition, **ARVELO bike racks** have been installed, promoting sustainable mobility, and the space has been defined with bollards with flat bars, improving organisation and safety. The intervention is completed **with OLEA planters,** adding vegetation and reinforcing integration.
The result is a more balanced space, where people can relax, meet, and enjoy the surroundings in a well-designed and accessible environment.

The City Council of Vic has implemented an initiative to enhance the urban space in the city. Recently, new urban furniture has been installed at the top of Verdaguer Street, next to the Main Square.

This new furniture consists of ARQ wooden benches, specifically designed to provide comfort to the residents and visitors of the city. These ARQ wooden benches are not only functional but also add an aesthetic touch to the environment. Their elegant and modern design blends seamlessly with the urban landscape, enhancing the beauty of the area. Furthermore, their strategic location allows people to sit, rest, and closely contemplate the emblematic location of the capital of Osona.
