**Need / Issue:** The space did not encourage pedestrian use or stay, limiting its potential as a meeting point.
**Solution:** Pedestrianisation and incorporation of lighting, furniture, and spatial organisation elements.
**Result:** A more accessible, organised square focused on public use is created.

In **Sallent de Gállego (Huesca),** the town square has been renovated, transforming it into a space designed for people and everyday use. The intervention **includes TOMSK light points in L and T configurations,** ensuring efficient lighting integrated into the surroundings. The space is equipped **with ARQ benches,** with and without backrests, allowing different ways of use and stay.
In addition, **ARVELO bike racks** have been installed, promoting sustainable mobility, and the space has been defined with bollards with flat bars, improving organisation and safety. The intervention is completed **with OLEA planters,** adding vegetation and reinforcing integration.
The result is a more balanced space, where people can relax, meet, and enjoy the surroundings in a well-designed and accessible environment.
