In this new play area, located in a residential zone of Vilafranca del Penedès, in the province of Barcelona, a comprehensive intervention has been carried out with the aim of offering a safe, attractive, and functional space for children and their families. Among the installed elements are the Piona seesaw, the modular play structure Klasik 5, which allows for multiple activities and encourages group play, and a wooden nest swing, perfect for enjoying both individually or in a group.
The area is complemented by urban furniture that enhances both the design and functionality of the surroundings. Tomsk bollards have been installed for efficient and safe lighting, PETRUS planters that bring greenery into the urban space, and Kube and Kube Plus benches that combine comfort with a contemporary aesthetic. Altogether, this contributes to creating a welcoming, accessible space adapted to the needs of its users.

Lavaur is a town in the department of Tarn, in the Occitanie region of France. BENITO has installed a pack of urban furniture in a park that includes benches from the Kube range and Omega bicycle racks protected by bollards and the Sol fence. The Kube bench is made of concrete, a solution for areas with extreme temperatures, a characteristic that the green-painted steel bicycle rack also has. It has been complemented by the modern Tomsk luminaires, which stand out for their robustness and durability.

The entire set gives an image of solidity with a sober aesthetic that adapts to the town, known for its Saint-Alain cathedral.

Located in front of West Africa, Tenerife is the biggest of the Canary Islands. It is overlooked by mount Teide, an inactive volcano which is the highest summit of Spain.

Although it is known as the Island of Eternal Spring, the weather of Tenerife presents some important contrasts as well as a relative air humidity caused by trade winds.

BENITO's **Kube bench** was the best option to face these climatic variations. Made of concrete, it is a very resistant product, ideal for coastal environments where salinity tends to corrode other kinds of materials.

Moreover, the minimalistic design of the product matches perfectly with the rest of the elements.

The City Council of Valencia has transformed a parking area located near the Pérez Galdós avenue into a square with a pergola and street furniture, such as benches and picnic tables which, combined with the paving, provide the space with its own design and identity..

The goal was to extend the pedestrian space on an axis with a large influx of vehicles. The **Pérez Galdós-Giorgeta avenue** is a very busy axis with an important presence of vehicles.

BENITO's Picnick tables are made of pinewood treated in vacuum pressure autoclave class IV against woodworm, termites and insects.

Separated from the Italian peninsula by the Strait of Messina, Sicily is the largest island in the Mediterranean Sea.

Due to very changeable temperatures and the aridity of its climate, **benches from the Kube range** were the products chosen to renovate the furniture in some seafront promenades.

The benches needed to be resistant to bad weather conditions and salinity. Thus, the fact that they are made of concrete was key when it came to choosing the product.

The **Kube bench** is made of precast textured granite grey concrete. It can be positioned both individually or in groups and requires low maintenance as concrete is a very resistant material.
The **LED light point Tomsk** made of steel has been very successful among architects who have decided to include it in their projects in view of its neutral aesthetic ideal for all environments. In this case, we can find it as a luminaire and beacon.
