Berga (Spain)

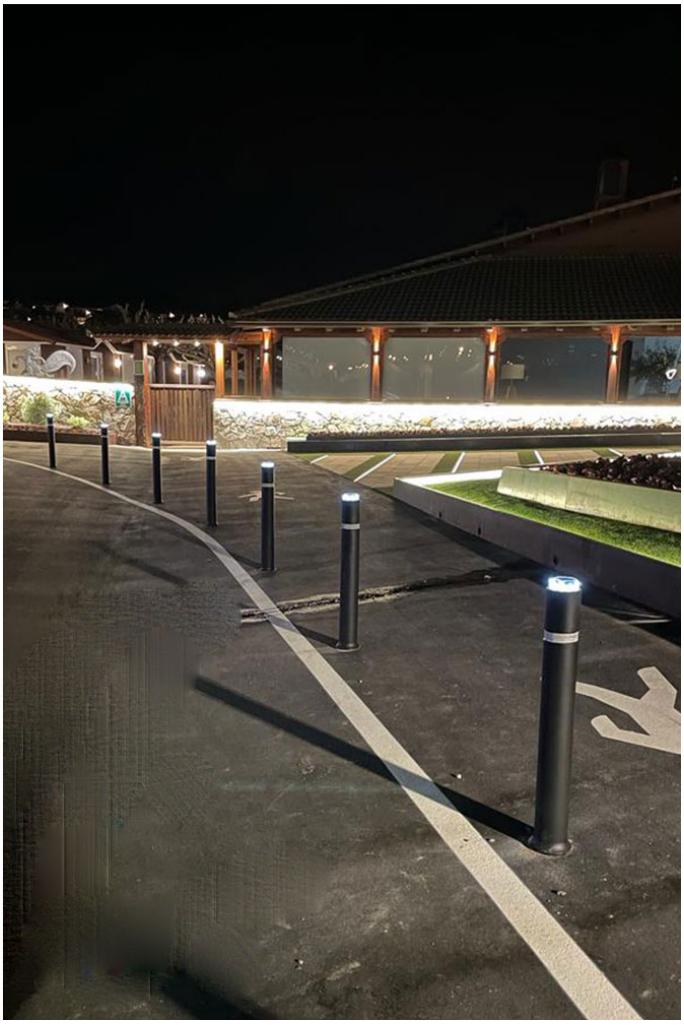
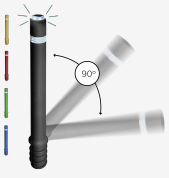
The city of Berga has installed bollards from the Hflex range made of polyurethane, with 90º total flexibility and LED lighting.



Flexible luminous solar with LED

HFLEXLEDSOL



The Berga Resort Camping is always trying to provide an unforgettable experience to customers. Therefore, apart from quality, sustainability is also one of its main concerns.

To reaffirm its position as a sustainable accommodation place, which has earned it the Biosphere certification, the camping has decided to install **solar luminous flexible bollards**.

Solar bollards are made of UV-resistant polyurethane and have total flexibility up to 90º as well as a solar-powered LED lighting system.

They have been placed din strategic points such as cycle lanes to prevent motor vehicles from invading them, and ensure they are well lit at night.
