**Yelloh! Village Le Brasilia campsite**, located in **Canet-en-Roussillon**, has enhanced its outdoor spaces with the installation of new urban furniture. The campsite has opted for a rustic and natural style that blends harmoniously with its surroundings. To achieve this, they have **combined Gavarres benches with Tor benches and Tor litter bins**, all made from treated pine wood and corten steel – a combination that fits beautifully into the site's green areas.

In addition, to improve safety at the campsite entrance, a fence composed of **St-André barriers in a mars brown finish** has been installed. These barriers not only separate pedestrian and vehicle areas, but have also been decorated with planters on top, adding a floral and aesthetic touch to the main entrance. A clear commitment to functional design and landscape integration in a privileged natural environment.
