Bucharest (Romania)

In Bucharest, vandal-proof and anti-graffiti ping pong tables have been installed, made from durable materials, ideal for school playgrounds and designed for long-lasting play.

Ping-Pong
VMOTCF

In Bucharest, the capital of Romania, several new model ping pong tables have been installed at the **Colegiul Economic Constantin Kiri?escu** for students to enjoy during recess. These tables are made with an SMC board, a composite material of fiberglass and high-quality resins, combined with a galvanized steel structure coated with baked paint.
The result is a table that is resistant, durable, functional, and visually appealing. Its sturdiness exceeds the required standards for gameplay and is specifically designed to withstand vandalism. It also features anti-shock and anti-graffiti properties. Additionally, the white side game lines are integrated into the board's surface layer, preventing wear and ensuring they are smooth to the touch. This maintains a consistent bounce without slipping, ensuring an optimal playing experience for the students.
