Ribera de Cardós (Spain)

Ribera de Cardós finishes the installation of a new playground area made of robinia wood that integrates perfectly with the environment.

Elm
JROY08

Ribera de Cardós, a village located in the province of Lleida, has installed a new playground area made of robinia wood that integrates perfectly with the natural environment.

The project, which entails the creation of a new playground area, includes a singular element from the **ROY range**, with a sustainable and maintenance-free design, consisting of two towers made of robinia wood. This material is characterised by its high quality, resistance and durability, which are qualities that make it resistant to bad weather conditions and natural wear.
