A sports centre is a place where a lot of people come together. Hundreds of people, many of whom are athletes, walk around an area where it is important that suitable litter bins and water fountains can be found. These are the two elements that BENITO has installed at the Fútbol Salou Sports Center, where, among other events, the MICFootball7 is held every year. INTROPDF##
The Kube Selectif litter bins are ideal because they allow you to select the type of rubbish you throw away and also have an ashtray attached. The Atlas drinking fountains help to quench your thirst after sport.
