Kube Plus
UM372LP

The city of Castellón de la Plana, capital of the province of Castellón, **has renewed the urban furniture in the city centre with the installation of KUBE elements.** This intervention embraces a contemporary and functional design that enhances the quality of public space and user comfort.
KUBE benches are made of high-strength concrete combined with wooden slats, a material that adds warmth and comfort to the ensemble. Their robust design makes them especially resistant to weather conditions and intensive use, eliminating the need for maintenance and ensuring a long service life in demanding urban environments.
The intervention is completed **with KUBE planters,** integrated alongside the benches to highlight the material presence and add landscape value through the incorporation of vegetation. This combination of furniture and green elements helps create more pleasant, sustainable, and visually attractive spaces, reinforcing the urban identity of central Castellón de la Plana.

In the town of Los Silos, located on the eastern side of Tenerife, a public-space enhancement has been carried out in the church square, next to the historic San Sebastián Ex-Convent, a former monastic centre and a key heritage landmark of the municipality. The intervention incorporates various urban elements from the BENITO URBAN range, selected for their durability, contemporary aesthetics and seamless integration within this culturally significant environment.

Kube Plus benches and chairs have been installed, made from granite-grey concrete and finished with natural-tone hardwood slats, providing comfort and resistance to the coastal climate. The renovation is completed with low-maintenance NER planters in corten steel, adding texture and character, along with Trajana bollards designed to demarcate the square and prevent vehicle access, improving safety and preserving the pedestrian nature of the space.

In this new play area, located in a residential zone of Vilafranca del Penedès, in the province of Barcelona, a comprehensive intervention has been carried out with the aim of offering a safe, attractive, and functional space for children and their families. Among the installed elements are the Piona seesaw, the modular play structure Klasik 5, which allows for multiple activities and encourages group play, and a wooden nest swing, perfect for enjoying both individually or in a group.
The area is complemented by urban furniture that enhances both the design and functionality of the surroundings. Tomsk bollards have been installed for efficient and safe lighting, PETRUS planters that bring greenery into the urban space, and Kube and Kube Plus benches that combine comfort with a contemporary aesthetic. Altogether, this contributes to creating a welcoming, accessible space adapted to the needs of its users.

Santa Cruz de Tenerife (Spain)

Concrete urban furniture on San Juan’s seafront (Tenerife): Kube Selectif bin and Kube Plus bench, salt-resistant, maintenance-free, and designed for comfort and durability.

Kube Plus
UM372LP

In **the coastal town of San Juan, on the island of Tenerife,** a project has been carried out to improve the seafront promenade, with the aim of enhancing the surroundings and offering greater comfort to residents and visitors.
To achieve this, **urban furniture elements made of concrete** have been installed, combining functionality, durability, and contemporary design. Among the incorporated products, the **Kube Selectif litter bin in brown** stands out. Its robust and elegant design blends perfectly with the coastal landscape. In addition, **Kube Plus benches** with backrests and wooden finishes have been installed, providing warmth and comfort to the rest areas. This material requires no maintenance and is highly resistant to weathering and sea salt, making it a durable solution for coastal environments.
An initiative that reinforces the commitment to sustainability and high-quality urban design.

The Rosa Center Mall of Playa Paraíso stands out for its modern design with big terraces and spectacular views of the sea and La Gomera island.

Besides being a space for leisure, gastronomy and sports, this mall is intended as a meeting place for thousands of people. The choice of the furniture was therefore essential.

The **Kube range**, whose products are made of concrete, was chosen since it combines perfectly with the aesthetic of the infrastructure.

The mall also for planters of different dimensions to add vegetation and refresh the environment, and selective bins to promote recycling and environmental respect.

Tenerife (Spain)

The El Llano square in Alcalá and the maritime promenade of Playa de San Juan have new benches and bins.

Guía de Isora is a municipality located in southwestern Tenerife. It presents a great natural wealth since a part of it belongs to the Corona Forestal Natural Park and another one to the Teide National Park.

It consists of 17 urban nuclei among which we can find Alcalá and San Juan, which already have new **BENITO benches and bins made of concrete**.

These products are resistant to high levels of salinity so they will increase the comfort of the inhabitants and tourists of El Llano square and the maritime promenade of Playa de San Juan.

This project is part of the recent renovation of street furniture carried out by Guía de Isora in the areas close to the coast.

The goal of the project was to create a unique space with a lot of personality, accessible and integrated in the urban environment; a vast green and pedestrian area designed for the citizens. This was achieved by installing urban furniture which, thanks to its arrangement, is an invitation to rest and socialise, made with modern elements, simple lines, and an efficient and sustainable high-quality material.

For this project, the Kube collection was chosen. It is made with precast textured granite grey concrete, with natural tropical wood boards that guarantee a comfortable sit.

The stadium of Al Wakrah can host up to 40,000 people. It was designed by the British-Iraqi architect Zaha Hadid and it is located 15km at the South of Doha.
This city is known for its commercial port as well as for being the entry to the state capital.
“An extraordinary stadium for an adventurous city.”
Modern, futuristic and functional, it is still loyal to the Qatari tradition. It integrates cultural references according to the weather conditions and functional requirements.
BENITO urban furniture has been installed outside the stadium. The selected option was the **KUBE Collection** – benches (UM372), chairs (UM372S), bins (PA672) and tables (UM372M), with straight and balanced lines, designed to embellish the area by giving it a contemporary style. They have a robust structure made of precast textured granite grey concrete, which guarantees a comfortable sitting experience even when temperatures get really high during summer.
Dalia bollards (H251) and several types of tree grates were also installed near the stadium.
