Alicante (Spain)

New themed playground at Gran Playa de Santa Pola (Alicante), featuring the NAO VITORIA tower from the TITAN collection as the centrepiece of the children's play area.

Nao Vitoria
JTEM12

Need / Problem: The area required a unique and attractive play space adapted to a family-oriented tourist environment by the sea.
Solution: Installation of a large themed structure from the TITAN collection, customised with a pirate-inspired design.
Result: An iconic and durable playground that strengthens the recreational identity of the seafront.
A **new pirate-themed playground has been created at Gran Playa de Santa Pola (Alicante),** designed to transform the public space into a place of adventure, imagination and family interaction.
The centrepiece of the project is the impressive **NAO VITORIA tower from Benito's TITAN collection.** This large-format structure encourages climbing, sliding, exploration and discovery through different play routes, offering a dynamic experience designed for intensive use.
Thanks to its customisation possibilities, the **TITAN collection** makes it possible to create unique themed playgrounds that integrate naturally into their surroundings while generating a distinctive identity.
Manufactured with highly durable and resistant materials, the installation is designed to support years of daily use by children and families in a privileged seaside location.
