The Hospitalet Bollard is a true classic in our Site Furnishing range.

Its design is simple and functional and stands out because of the stainless steel ring which adds a distinctive touch to this sober Bollard made from iron and finished in forge black.

This Bollard is available in different versions: removable, flexible (made in UV-resistant Cauflex with a reflective strip), with base plate and with base plate and embedded foot. A wide variety of versions of the same product to meet the specific planning needs of every project. Bollard made of metal and a stainless steel ring with epoxy primer coating and black wrought iron coloured polyester powder coated finish.

Recommended anchoring : Embeddable removable base
