

High density polyethylene - HDPE

Colourful panels of Benito play equipment are made of HDPE. They have a rough aspect on both sides and is homogeneously imbued. It has been tested to DIN EN 71-3, -9, -10, -11 (safety for toys) and because of its weathering- and scratch-resistance it is the better choice for applications where until now painted or glazed plywood or MDF sheets has been used. The high quality of this product leads to very long durability. Even after 10 years, embrittlement of the material is not to be expected.

Advantages:

- No maintenance required
- Easy to clean off graffiti
- 100% recyclable
- No chipping and no risk of injury from splinters

- Uniform colour throughout and resistant to UV rays
- Bacterial and fungal attack proof
- Resistant to chemical abrasion and corrosion
- Non-toxic and compliant with European safety standards

Applications:

- Roofs
- Protective panels
- Decorative elements
- Seats

Thickness: 10-12-15-19mm

Edge detailing: R4mm

Colours:

- Yellow RAL 1023
- Red RAL 3020
- Orange RAL2008
- Green RAL6028
- Light Green RAL6018
- Blue RAL5017
- Grey RAL7042
- White RAL1001
- Black RAL9005
