

Panels, HDPE: High-density polyethylene characterized by its resistance to chemical abrasives and unaffected by corrosion as it is a polymer. Due to its light, elastic nature, it offers high resistance to impact, making it very difficult to break.

A x B

A=4230mm 13.40m² 0.6m 4

B=3490mm

Materials:

Structure, Laminated Wood: Scandinavian laminated pinewood with autoclave (class IV) treatment.- In case this type of wood is subjected to variable weather conditions, laminated pinewood can present some tiny cracks on the surface that do not reduce its durability at all. As regards with Resin and knots, please note that these are part of its natural appearance.

Metallic parts: Stainless steel AISI-304, hot-dip galvanized steel and aluminium. Galvanized steel and baked-on paint, highly resistant to abrasion, corrosion, chemicals and stains, with excellent weather resistance.

Fixings: Electro galvanized and stainless steel quality 8.8 DIN267, AISI-304.

- None of these materials needs a special treatment for its disposal.
- For a very severe use of the equipment should increase inspection / maintenance.
- Don't use the product before the installation/maintenance is ready.
- Please check the maintenance instructions.

The biggest part (mm): 1640x460x280 / Maximum weight of parts (kg): 25,50

IMPACT ZONE: Required security area. Ground coverings according to the norm EN1176-1:2017 are recommended.
Spare parts/replacements availability: 10 years.
