

[UM510G](#)

The Egea Drinking Fountain stands out from the other drinking fountains in the Site Furnishing range because of its green colour scheme. Made of iron, it has a round main structure and a nickel-plate pressure tap. Like the Atlas Drinking Fountain, it also comes in a double version with two taps.

Corps en acier de Ø 190 mm, traité avec Ferrus, procédé qui protège le fer et garantit une résistance optimale à la corrosion. Finition couche primaire époxy et peinture poudre polyester de couleur vert RAL 6005. Robinet poussoir (UM510G) avec support en acier nickelé. Grille avaloir et cadre triangulaire en acier galvanisé.
