Some of the projects we have done

Solution of Citizen ECO benches and GEA bins on the terrace of Barcelona Cathedral, made of ReBnew, 100% recycled plastic, to enhance comfort and sustainability.

Barcelona (Spain)

Installation in Barcelona, near the port, with picnic tables, planters, and GEA litter bins made of ReBnew material, resistant to coastal corrosion.

Barcelona (Spain)

Sant Julià de Ramis (Girona) commits to sustainability and installs new Citizen ECO benches and Gea bins.

Girona

Street furniture from the Petrus collection by BENITO at the seaside.

El Perelló (Spain)

New Gea bins, entirely made of recycled polymer, have been installed in the pedestrian area of Nerja's old town.

Nerja (Spain)

On the terrace of **Barcelona Cathedral**, a solution was sought to integrate benches and bins that blend with the environment. They chose products made with **ReBnew**, a material composed of **100% recycled and recyclable plastic**, aiming to improve rest areas and waste management for visitors.

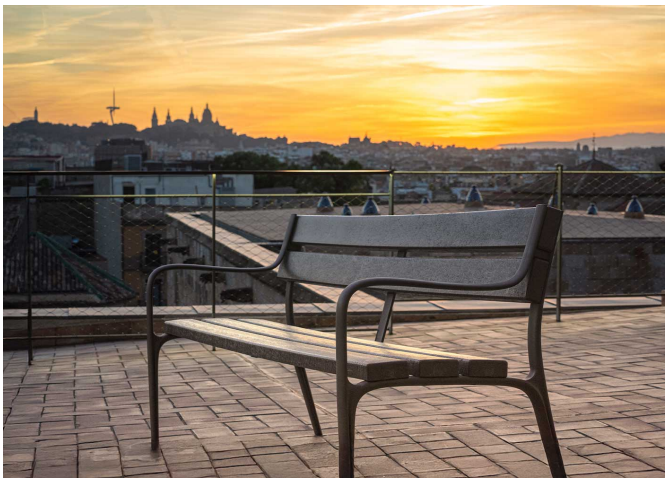

The elements incorporated are **Citizen ECO benches** and **GEA bins**, both designed to offer functionality, durability, and a harmonious integration with the historic surroundings of the building. Thanks to the use of ReBnew, these products stand out not only for their durability and low maintenance but also for their commitment to **sustainability** and the **circular economy**. Their sober and contemporary design respects the aesthetics of the site, providing comfort and order to a space of great cultural and heritage value.

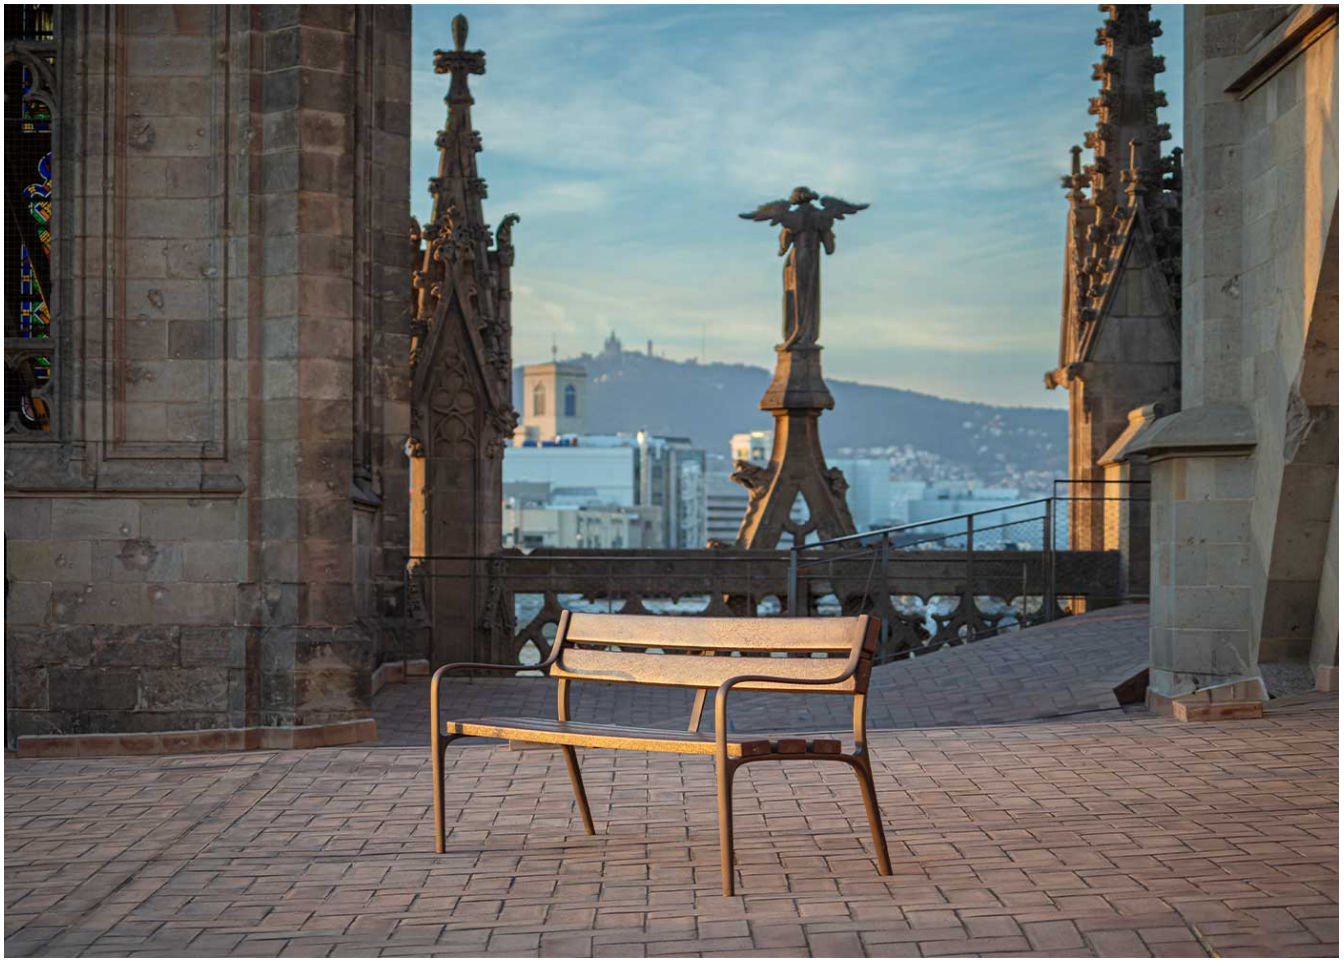

This initiative reinforces Barcelona Cathedral's commitment to the **environment**, promoting responsible and sustainable practices at one of the city's main tourist landmarks.

In Sant Julià de Ramis, Girona, a strong step towards urban sustainability is taken with the installation of our Citizen ECO benches and Gea waste bins.

These elements not only beautify public spaces but also promote eco-friendly practices, made from recycled materials and designed for long-lasting durability. This initiative reflects the town's commitment to a greener and more conscious future, offering its residents and visitors more sustainable and environmentally-friendly public spaces.

El Perelló, in Valencia, is a coastal city with promenades near the sea. In one of these spaces, BENITO has installed urban furniture suitable for relaxing and enjoying the moment.

The Petrus line is present with 4 loungers, 4 chairs with backs, and half a dozen backless chairs. It is complemented by 8 Kube planters, 6 Gea recycled polymer bins, 2 accessible fountains, and an Atlas foot wash.

A Futtoc table has also been installed so people can play this game, where you use your feet, head, knees, or chest to move a ball, but not your hands.

Nerja is a fishing and agricultural city which belongs to the province of Malaga. It is located in the eastern end of the Costa del Sol, at the border with the province of Granada, and bathed by the Mediterranean Sea.

The City Council of Nerja has installed new bins in the pedestrian area of the old town. More precisely, they have installed the Gea model, made of recycled polymer recovered from urban selective collection, thus guaranteeing the circularity of the material from its origin to the end of its useful life. Attractive design, maximum functionality, resistance to UV rays, water and bad weather conditions.
