The S'Arenal Yacht Club in Llucmajor a offers activities in the nautical and sporting world. It is committed to sustainability and, in this sense, has installed several single and double planters made of BENITO's ReBnew material.

This is why they have opted for a recycled and recyclable plastic that does not need maintenance and withstands the harsh conditions of a port, by the sea and the salinity of the water. They are large capacity planters for trees and large plants.
