Need / Problem: The area required more green space, social gathering areas and facilities that encourage outdoor activity.
Solution: Creation of a park featuring children's play areas, a fitness circuit, urban furniture and bicycle parking.
Result: A greener, more active space connected to both the city and the waterfront.
Parc Mediterrània, inaugurated at the **Port of Tarragona,** forms part of the transformation of the Port Authority surroundings into a new sustainable, pedestrian-friendly and renaturalised urban space. The project has increased green areas, improved walking and cycling mobility, and created a new meeting point by the sea.
BENITO contributed to the project with the installation of a **playground made from robinia hardwood,** a durable material that integrates naturally into the landscape. The area includes **ROY 11 balance structures, ROY 107 modular play units and swings,** designed to encourage activity, exploration and shared play.
The space also features a **Work-Fit fitness circuit,** entirely made of wood, allowing users to combine walking or running with physical exercise and promote healthy lifestyles.
The project is completed with **Universal bike racks,** creating comfortable gathering areas and encouraging more sustainable mobility.
