Some of the projects we have done

New Parc Mediterrània at the Port of Tarragona, a renaturalised space with play, sports and leisure areas that strengthen the connection between the port and the city.

**Tarragona (Spain)**

Renovation of the playground at Passeig del Mar in Palamós (Girona) with new robinia play equipment, creating an integrated, durable space adapted to the marine environment.

**Girona (Spain)**

**Need / Problem:** The area required more green space, social gathering areas and facilities that encourage outdoor activity.
**Solution:** Creation of a park featuring children's play areas, a fitness circuit, urban furniture and bicycle parking.
**Result:** A greener, more active space connected to both the city and the waterfront.
Parc Mediterrània, inaugurated at the **Port of Tarragona,** forms part of the transformation of the Port Authority surroundings into a new sustainable, pedestrian-friendly and renaturalised urban space. The project has increased green areas, improved walking and cycling mobility, and created a new meeting point by the sea.
**BENITO** contributed to the project with the installation of a **playground made from robinia hardwood,** a durable material that integrates naturally into the landscape. The area includes **ROY 11 balance structures, ROY 107 modular play units and swings,** designed to encourage activity, exploration and shared play.
The space also features a **Work-Fit fitness circuit,** entirely made of wood, allowing users to combine walking or running with physical exercise and promote healthy lifestyles.
The project is completed with **Universal bike racks,** creating comfortable gathering areas and encouraging more sustainable mobility.

**Need / Issue:** The play area required renovation to improve durability, safety, and adaptation to the marine environment.
**Solution:** Installation of a new robinia wood play set with various play elements.
**Result:** A more attractive, safe, and integrated space is created, reinforcing the family-friendly character of the promenade.

At **Passeig del Mar in Palamós, the playground has been renovated,** incorporating a new play area designed to integrate with the seafront environment and withstand intensive use.
The space includes three main elements: **a cradle seat swing, a spring rider, and a pirate ship structure incorporating balance elements, slides, and a climbing net.** The entire set is **made of robinia wood,** a material particularly suitable for outdoor use due to its high durability and resistance.
Designed for children up to 6 years old, the playground integrates naturally into the promenade, introducing a maritime-themed play concept. The intervention combines structural robustness with a light, coherent design, enhancing the play experience and reinforcing the space as a family meeting point.
