Pinet, a French municipality located in the Hérault department in the Occitanie region, has recently inaugurated a new space for leisure for young children.

The area, which has a surface of 150m², becomes a new space to promote family life where children can have fun and play outdoors.

It comprises a shock-absorbing surface made with a flexible and permeable material, metallic security fences, and a VITI slide tower from BENITO's EDUCA collection for children aged three to six. This element is designed to promote healthy eating habits and includes a slide for adventurous children and another for younger children. It also has lots of interactive panels: grapes, watermelon seeds, a citrus climbing wall, an apple slide, a net...

There are other products such as the VILA house and the ZEA slide for children aged two to three, designed to promote the discovery of animals and the natural environment, as well as a three-dimensional net.

Almenara is a city of the province of Castellón in the Valencian Community. It is located between the coast and the Sierra d'Espana, on an enormous extension of agricultural land.

The City Council of Almenara decided to build a new playground area in order to maximise enjoyment while ensuring children's safety. The city took advantage of the implementation of the project to renew the whole area by installing maintenance-free Citizen Eco benches, 100% made of recycled and recyclable plastic, as well as Essentials light points with Deco Lira luminaires whose optimised optical design ensures a perfect glare control and an adequate cut-off for pedestrians.
