Nordic
ILNO

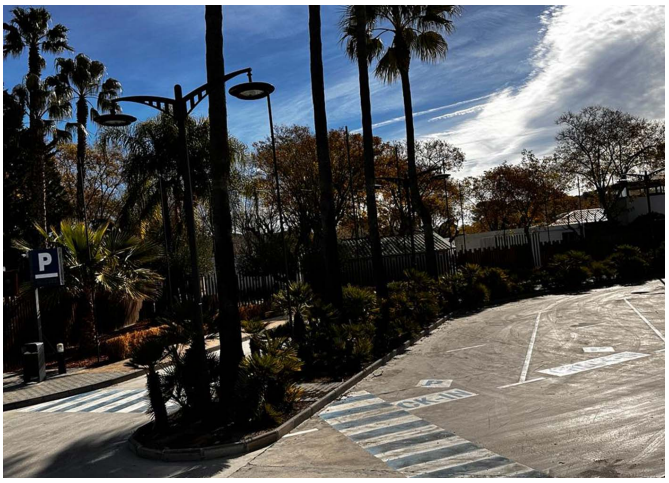

Nordic luminaires with brackets of the same series and Essentials poles have been installed by BENITO at the Tamarit campsite, next to Altafulla, in Tarragona. Tamarit Beach Resort is one of the best-equipped campsites in the area and has a wide variety of services, including bike rental, laundry facilities, and various sports activities.

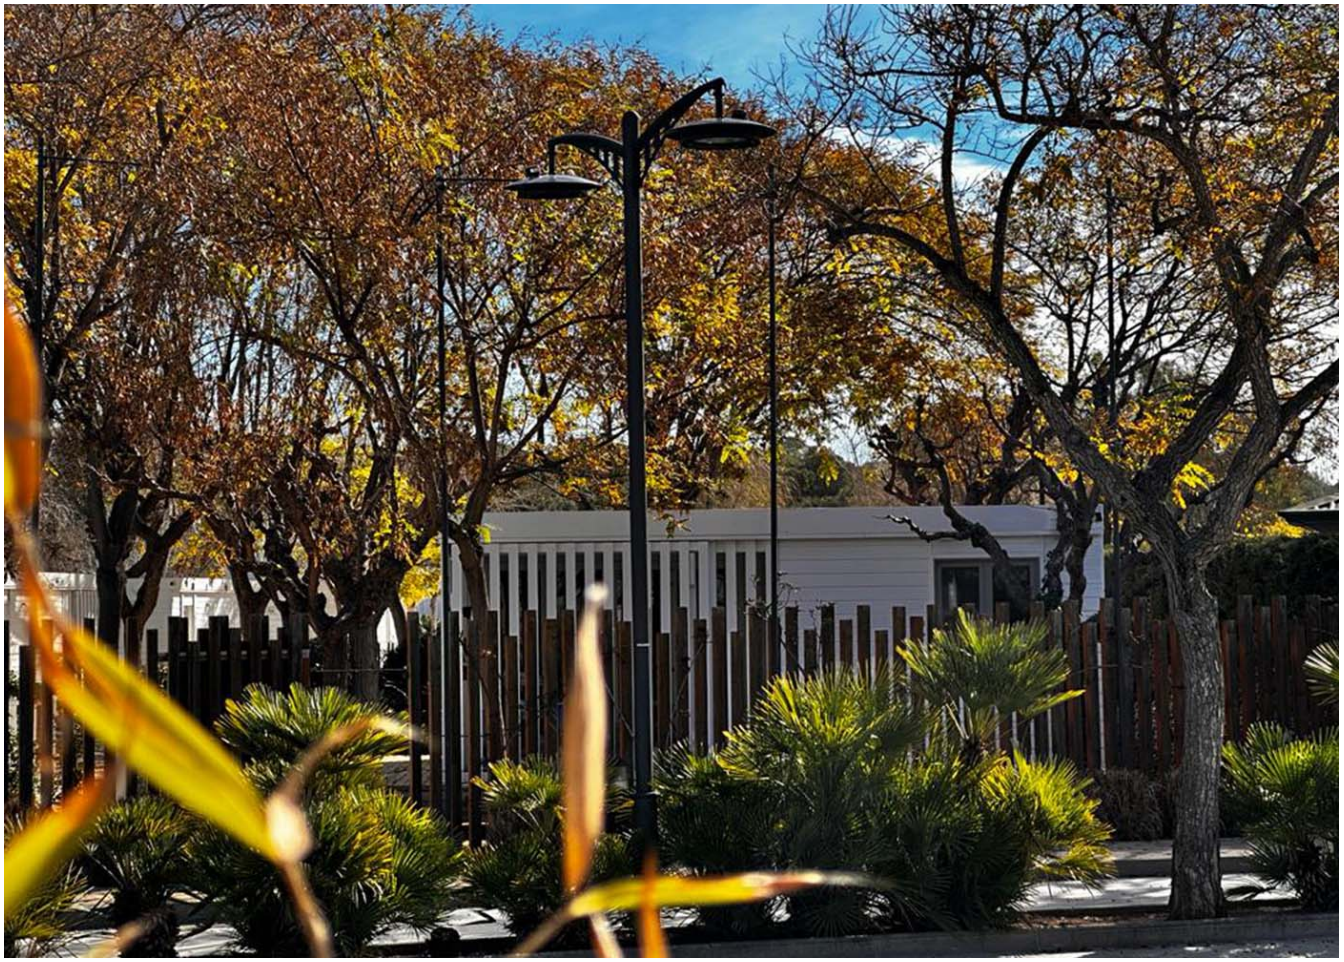

The Nordic luminaire has an elegant and contemporary design and is conceived for residential applications. It fits perfectly in a high-end camping site like the one in Tamarit. All luminaires have been installed with the remote management system, which allows for energy and cost savings as they can function with more or less power depending on the capacity of the campsite.

Tavèrnoles is a small village belonging to the province of Barcelona, which represents the entry point to the Sau Reservoir from its western end.

The City Council has chosen **BENITO street furniture and lighting products** to offer rest areas and a greater sense of security to neighbours and visitors.

Among the installed products, there are **NeoBarcino benches and chairs**, and **Deco Horizon luminaires** whose aesthetic harmonises perfectly with rural and historical environments.

Almenara is a city of the province of Castellón in the Valencian Community. It is located between the coast and the Sierra d'Espadan, on an enormous extension of agricultural land.
The City Council of Almenara decided to build a new playground area in order to maximise enjoyment while ensuring children's safety.
The city took advantage of the implementation of the project to renew the whole area by installing maintenance-free Citizen Eco benches, 100% made of recycled and recyclable plastic, as well as Essentials light points with Deco Lira luminaires whose optimised optical design ensures a perfect glare control and an adequate cut-off for pedestrians.
