Need / Problem: The area required more green space, social gathering areas and facilities that encourage outdoor activity.
Solution: Creation of a park featuring children's play areas, a fitness circuit, urban furniture and bicycle parking.
Result: A greener, more active space connected to both the city and the waterfront.
Parc Mediterrània, inaugurated at the **Port of Tarragona,** forms part of the transformation of the Port Authority surroundings into a new sustainable, pedestrian-friendly and renaturalised urban space. The project has increased green areas, improved walking and cycling mobility, and created a new meeting point by the sea.
BENITO contributed to the project with the installation of a **playground made from robinia hardwood,** a durable material that integrates naturally into the landscape. The area includes **ROY 11 balance structures, ROY 107 modular play units and swings,** designed to encourage activity, exploration and shared play.
The space also features a **Work-Fit fitness circuit,** entirely made of wood, allowing users to combine walking or running with physical exercise and promote healthy lifestyles.
The project is completed with **Universal bike racks,** creating comfortable gathering areas and encouraging more sustainable mobility.

Custom-made Robinia wood playground, specially designed for the Berga Resort campsite in Berga (Barcelona)

INTROPDF##

A multidisciplinary team has created a magnificent children's playground in the grounds of the Berga Resort campsite in Berga. This campsite wanted to create a play area that would adapt to the terrain, and this has been achieved. This required earthworks, creating paths and bridges, thereby including the landscape vision. The park has been built with all kinds of robinia wood games, small mounds have been used to integrate slides and trampolines have been inserted into the ground, among other innovative features.

One part of the park is for children and the rest for adults. The park has been complemented with recycling bins made of robinia wood and benches made of the same material, creating a spectacular ensemble.
