A complete playground with a set of recreational equipment, healthy elements, adapted flooring and EcoCitizen benches in Ostia, Italy

Italia

New Parc Mediterrània at the Port of Tarragona, a renaturalised space with play, sports and leisure areas that strengthen the connection between the port and the city.

Need / Problem: The area required more green space, social gathering areas and facilities that encourage outdoor activity.

Solution: Creation of a park featuring children's play areas, a fitness circuit, urban furniture and bicycle parking.

Result: A greener, more active space connected to both the city and the waterfront.

Parc Mediterrània, inaugurated at the **Port of Tarragona**, forms part of the transformation of the Port Authority surroundings into a new sustainable, pedestrian-friendly and renaturalised urban space. The project has increased green areas, improved walking and cycling mobility, and created a new meeting point by the sea.

BENITO contributed to the project with the installation of a **playground made from robinia hardwood**, a durable material that integrates naturally into the landscape. The area includes **ROY 11 balance structures**, **ROY 107 modular play units and swings**, designed to encourage activity, exploration and shared play.

The space also features a **Work-Fit fitness circuit**, entirely made of wood, allowing users to combine walking or running with physical exercise and promote healthy lifestyles.

The project is completed with **Universal bike racks**, creating comfortable gathering areas and encouraging more sustainable mobility.
