Valladolid

A secure, customised bicycle rack in a car park in Valladolid city centre

ARVELO
VBF06

BIKI
VBE01

The Valladolid city council has relied on BENITO's know-how to install a secure parking facility for bicycles in the underground car park in the main square.

The result is a transparent box operated through a mobile application, also developed by BENITO..

Gota
VBA21

Maia
H214ZR

Barcelona is becoming a reference when it comes to the application of urban solutions.
Most sections of the city cycle lane are already equipped with Gota separators. Moreover, the installation is usually complemented with the beaconing of the extremities thanks to the flexible bollard Maia, which is maroon and includes to reflective strips to bring visibility and elegance.
Finally, other sections are equipped with the corresponding signage and the Biki maintenance station for bicycles.
