

Wooden decking has been installed outside CosmoCaixa, while the interior now features PIK picnic tables in ReBnew, ReBnew planters, and PICCO four-compartment bins to ensure efficient recycling.

Barcelona (Spain)

Wooden decking has been installed outside CosmoCaixa, while the interior now features PIK picnic tables in ReBnew, ReBnew planters, and PICCO four-compartment bins to ensure efficient recycling.

Outside the **CosmoCaixa in Barcelona**, one of Europe's leading science museums and a benchmark in scientific outreach promoted by the "la Caixa" Foundation, a public-space upgrade has been carried out to enhance visitor comfort. The exterior area now includes **wooden-slat decking**, creating generous and comfortable spaces where visitors can rest, wait or enjoy the landscaped surroundings.

Inside the facility, functionality and sustainability have been strengthened with the installation of **PIK picnic tables made from ReBnew**, a highly resistant recycled material. These are complemented by **ReBnew planters**, which organise and green the communal areas, and by **PICCO bins with four compartments**, designed to facilitate efficient waste separation and encourage responsible recycling habits among visitors. This intervention improves both user comfort and environmental management within the museum.
