France

Installation of Gavarres benches, tables and bins, ideal for rural environments thanks to the use of wood and Corten steel.

Elements of BENITO's **Gavarres street furniture** range have been installed in a park located in the French Alp region.

Products of this collection are a very good option for rural and mountain environments as they have a rather rustic aspect due to the materials they are made of: wood and Corten steel.

In both cases, they are living materials, which means their appearance will evolve over time. However, these changes don't affect their resistance or durability.

The urban furniture from the Gavarres collection is characterized by its pine wood planks treated with autoclave and corten steel structures. This combination not only offers an aesthetic and contemporary design but is also ideal for adding a more natural and warm touch to urban spaces.

Furthermore, its weather resistance ensures durability and minimal maintenance, making it a practical and sustainable option for public areas in the city.
