In Fuerteventura, the urban furniture is being renewed with Citizen benches and bins, designed by Eugeni Quillet, and recycled ReBnew elements are being incorporated, creating a sustainable and welcoming environment.

In the village of **Tuineje**, located on the island of **Fuerteventura**, a major renovation of the **urban furniture** has been carried out with the aim of improving public space for residents and tourists. All the benches in the village have been replaced with **Citizen wooden benches and chairs**, combined with **Citizen litter bins**, models designed by **Eugeni Quillet** in an elegant **Marson** color. In addition, the municipality has committed to **sustainability** by incorporating furniture made from recycled material, known as **ReBnew**. This furniture includes **Pik picnic tables** and **ROM bollards**, which are also used for traffic control in the city center. The renovation aims to create a more **modern and comfortable** environment for residents and tourists visiting the village this summer, providing a more functional and **environmentally friendly** space.

New Gea bins, entirely made of recycled polymer, have been installed in the pedestrian area of Nerja's old town.

Nerja is a fishing and agricultural city which belongs to the province of Malaga. It is located in the eastern end of the Costa del Sol, at the border with the province of Granada, and bathed by the Mediterranean Sea.

The City Council of Nerja has installed new bins in the pedestrian area of the old town. More precisely, they have installed the Gea model, made of recycled polymer recovered from urban selective collection, thus guaranteeing the circularity of the material from its origin to the end of its useful life. Attractive design, maximum functionality, resistance to UV rays, water and bad weather conditions.

Kfar Saba is a city located in the Central District of Israel, near the so-called Green Line, which separates the Israeli territory from the one claimed by Palestine.

To furnish its main avenue, the city has chosen some of BENITO's most popular design products: the **Citizen bench and bin**, designed by Eugeni Quitllet, and the **Oslo bench**, entirely created by the Group.

These are contemporary, comfortable elements with a minimalist aesthetic, which perfectly combine with urban environments.

Installation of Citizen benches in Valencia, thus offering rest and socialisation areas and making the city healthier and more inclusive.

Inaugurated in the year 2000, the Orriols Park is located next to the Levante's stadium and occupies approximately 40,000 m2.

This park includes a sports centre where people can swim, plan tennis, paddle, etc., as well as a playground area. In its centre, there is a large surface of water with an island that contains a cupola.

It is around this place that **Citizen benches** designed by Eugeni Quitllet, a renowned designer, have been installed. This product is composed of ductile iron legs and tropical wood boards, all treated to ensure a long lifespan.

The **City Council of Muel**, located in the province of Zaragoza (Aragon), contacted the Group BENITO NOVATILU to create a new playground area while preserving the history of the area where it would be installed.

The project took place near the Roman dam, location that represented a great challenge for the Group because of its historical nature.

The aim of the project was to achieve a balance between local history and the innovative playground equipment from the Group BENITO NOVATILU in order to create leisure spaces for all ages by using products that integrate to the environment.

After conducting several studies of the area and developing the technical blueprint of the park, in compliance with the current safety regulations, the **BOSCO 4**, 100% designed by the Group BENITO NOVATILU was chosen as the main element. This product consists of a multi-level tower with platforms, slides installed at different heights, vertical panels and great challenges which stimulate the strength, coordination and balance of children, in compliance with the European safety standard EN1176. Moreover, it is made with maintenance-free materials resistant to bad weather conditions and vandalism, and its design recalls tree houses, which makes it ideal for natural as well as urban environments.

Other products were also installed: **swings JL15**, **spring swings JFS10**, a **dynamic element JPV413** which includes several features such as a moving bridge, and the **swivelling element JC06**.

Llers is a municipality in the county of Alt Empordà, in the province of Girona, Catalonia.

Citizen benches and chairs, from the first collection of street furniture by Eugeni Quitllet, one of Spain's most internationally renowned designers, were installed. CITIZEN is a bench made with ductile iron legs treated with Ferrus, a protective process that guarantees high resistance to corrosion. This treatment consists of three layers applied after shot cleaning all impurities and an electrolytic bath, and an epoxy and polyester Marson paint coating.
