Cuenca (Spain)

Installation of a 41 m² Pumptrack in the province of Cuenca: a safe space designed to learn and enjoy on bikes and scooters.

Pump Track 41mL
JPT050

In Landete, province of Cuenca (Spain), a **new 41 m² Pump Track** has been installed as part of a entertainment area. Located next to a rest area, it provides a space for physical activity as well as relaxation and socialization.
The Pump Track is a recreational circuit ideal for bicycles, scooters, skates, and skateboards, suitable for users of all ages. Its GRP (glass fiber-reinforced polyester) modules ensure durability and resistance, with a textured surface that provides good grip without being abrasive in case of falls. Additionally, it is easy to assemble and anchors securely to the ground, ensuring stability and safety during use.
This entertainment area also stands out for its low maintenance and easy cleaning, complying with PPP 61005A:2021 standards. It includes an impact area according to EN1176-2017 for added safety, and replacement parts are guaranteed to be available for 10 years. Located near a rest area, it allows companions and users to enjoy a complete environment, combining fun and relaxation in the same space.
