BENITO
–Playground Equipment

Florence (Italy)

In Florence, a playground made of Robinia wood has been installed, integrated into a green environment, durable, maintenance-free, and featuring a variety of games.

In **the Ponte a Greve Garden, in Florence, Italy,** a **new playground has been installed, built with Robinia wood.** This type of wood stands out for its high resistance and durability, as well as being maintenance-free, making it an ideal option for public spaces.
The park has been designed to naturally integrate into the surrounding green environment, respecting the landscape and providing a welcoming space for play and social interaction.
Among the elements that make up the park are a large modular play structure allowing for multiple activities, a balance game that stimulates motor coordination, a spring rocker for younger children, classic swings, and an interactive musical panel that invites creativity.
This installation represents a commitment to outdoor, sustainable, and accessible play, encouraging children's interaction with nature and with other kids from the neighborhood.
