In **Ecatepec de Morelos,** very close to Mexico City, the **Parque Ecológico Lago de Texcoco** has been developed as one of the country's largest environmental, recreational and sports projects. **Designed to restore the former lacustrine environment and transform it into a green space accessible to millions of people,** the park integrates a wide network of facilities: **football and American-football fields, baseball fields and batting cages, multi-use courts, a skatepark, parkour circuits, a labyrinth, picnic areas, a bicycle-rental station, outdoor gyms and multiple rest and social spaces**.

Benito Urban has contributed to the equipment of this landmark project by installing **Kube chairs and bins, Petrus loungers and Lisa planters, all made of concrete,** a material that ensures high resistance and maximum durability in an intensive-use environment. Additionally, **Benito sports courts and Stark luminaires** have been incorporated, strengthening the park's activity offering and providing lighting suited to its needs. Thanks to these actions, the Parque Ecológico Lago de Texcoco is consolidated as a modern, ecological and fully equipped public space for sports, recreation and social integration.
