Need / Issue: The space required renovation to improve its use, lighting, and urban comfort.

Solution: Redevelopment of the promenade with new seating areas, lighting, and urban furniture.

Result: The quality of the space is improved, encouraging pedestrian use and longer stays.

In Manlleu (Barcelona), the Passeig del Ter has been renovated, transforming it into a more accessible, functional environment focused on public use.

The intervention includes new walking and resting areas, as well as the creation of a new square and a new street that structure the space and improve its connectivity. In terms of lighting, CICLO and TOMSK light points have been installed in L and T configurations, ensuring efficient illumination for both vehicular and pedestrian traffic.

The project is completed with the installation of **Minsk benches and Mielek litter bins in marson colour**, creating a coherent image adapted to the natural surroundings of the promenade.

An intervention that reinforces the character of the riverside space, improving its functionality and encouraging everyday use.
