Tarragona (Spain)

Comprehensive renovation of Bassot Park in Vilalba dels Arcs, featuring new robinia playground equipment, urban furniture and Vialia Lira luminaires, creating a natural, functional space for all ages.

In **Vilalba dels Arcs (Tarragona),** a municipality of 611 inhabitants, **Bassot Park has undergone a comprehensive turnkey renovation together with Benito Urban,** transforming into a more functional, natural space adapted to all ages.
The new playground **features robinia wood play structures,** a material that enhances integration with the surroundings and reinforces the park's natural character. The play area **is completed with modular games, balance elements for younger children, and spring rockers,** creating a dynamic environment that encourages development and social interaction.
The project also **includes seating areas for adults, with Gavarres picnic tables, Minsk benches, Salou litter bins, and Kube concrete benches,** creating a comfortable setting resistant to intensive use.
The intervention is completed **with the renewal of lighting through Vialia Lira luminaires,** providing uniform and efficient illumination seamlessly integrated into the space. The park now guarantees safety and comfort during low-light hours, consolidating its role as a meeting point for the entire municipality.

In Les Masies de Voltregà, in the province of Barcelona, the weekly market area has been renovated with the **installation of new urban elements** that promote community living, sustainability, and shared enjoyment.

Among them are the **DARA litter bins, in olive green,** also available in marson, grey, and burgundy. This model has a capacity of 100 litres and incorporates a ashtray and cover, offering both functionality and design in a single product.
Picnic tables Gavarres have also been installed, made of pine wood and reinforced with iron on one side, ensuring strength and durability in daily use.

The area is completed with a **robinia children's playground** featuring a wide range of equipment: **two slides installed on the slope, spring riders, swings, sand play, and balance games**, creating an ideal environment for family and community leisure.

Igualada has created a large central park in an area of 20,000 square metres that includes a vast artificial lake, a skate park and a large esplanade with trees and playground equipment.

This wooded area is where picnic tables have been installed with wooden seats from the Gavarres collection and various beacons to illuminate the path running through the park

INTROPDF#
The North Campus of the Polytechnic University of Catalonia (UPC) contains various spaces, both classrooms and auditoriums, rooms for activities, the rectorate and different outdoor spaces. It is in its surroundings where various units of tables have been installed with their respective benches from the Gavarres range. There are also backless benches that serve as gathering places for students.
#INTROPDF##
Both the table and the benches are made of pine wood treated against woodworms, termites and insects. They have stainless steel screws and a Corten steel plate on the feet since it is recommended to anchor them.

Installation of Gavarres benches, tables and bins, ideal for rural environments thanks to the use of wood and Corten steel.

Elements of BENITO's **Gavarres street furniture** range have been installed in a park located in the French Alp region.

Products of this collection are a very good option for rural and mountain environments as they have a rather rustic aspect due to the materials they are made of: wood and Corten steel.

In both cases, they are living materials, which means their appearance will evolve over time. However, these changes don't affect their resistance or durability.

Barcelona has been one of the main drivers of the transformation of cities into a more sustainable model. One of its most important projects are the superblocks, which were created to pacify traffic in an urban area and pedestrianise it. The goal was not only to reduce speed and the quantity of vehicles that circulate in those areas, but also to offer new spaces to pedestrians. To achieve this, the city of Barcelona chose our products: Slow speed reducers, Gavarres tables, BCN bins and healthy elements.
Possibilities are infinite, these projects adapt perfectly to our large range of products. For this project, the colours of the Gavarres picnic table and the street workout elements were customised according to the needs of the Barcelona City Council.
