BENITO
–Site Furnishing

Tarragona (Spain)

Comprehensive renovation of Bassot Park in Vilalba dels Arcs, featuring new robinia playground equipment, urban furniture and Vialia Lira luminaires, creating a natural, functional space for all ages.

In **Vilalba dels Arcs (Tarragona),** a municipality of 611 inhabitants, **Bassot Park has undergone a comprehensive turnkey renovation together with Benito Urban,** transforming into a more functional, natural space adapted to all ages.
The new playground **features robinia wood play structures,** a material that enhances integration with the surroundings and reinforces the park's natural character. The play area **is completed with modular games, balance elements for younger children, and spring rockers,** creating a dynamic environment that encourages development and social interaction.
The project also **includes seating areas for adults, with Gavarres picnic tables, Minsk benches, Salou litter bins, and Kube concrete benches,** creating a comfortable setting resistant to intensive use.
The intervention is completed **with the renewal of lighting through Vialia Lira luminaires,** providing uniform and efficient illumination seamlessly integrated into the space. The park now guarantees safety and comfort during low-light hours, consolidating its role as a meeting point for the entire municipality.

The **City Council of Muel**, located in the province of Zaragoza (Aragon), contacted the Group BENITO NOVATILU to create a new playground area while preserving the history of the area where it would be installed.
The project took place near the Roman dam, location that represented a great challenge for the Group because of its historical nature.
The aim of the project was to achieve a balance between local history and the innovative playground equipment from the Group BENITO NOVATILU in order to create leisure spaces for all ages by using products that integrate to the environment.
After conducting several studies of the area and developing the technical blueprint of the park, in compliance with the current safety regulations, the **BOSCO 4**, 100% designed by the Group BENITO NOVATILU was chosen as the main element. This product consists of a multi-level tower with platforms, slides installed at different heights, vertical panels and great challenges which stimulate the strength, coordination and balance of children, in compliance with the European safety standard EN1176. Moreover, it is made with maintenance-free materials resistant to bad weather conditions and vandalism, and its design recalls tree houses, which makes it ideal for natural as well as urban environments.
Other products were also installed: **swings JL15**, **spring swings JFS10**, a **dynamic element JPV413** which includes several features such as a moving bridge, and the **swivelling element JC06**.
