Need / Issue: The environment required rest areas integrated into the existing urban and landscaped surroundings.
Solution: Installation of Benito Design+ furniture in olive green to reinforce the identity and aesthetic quality of the space.
Result: A more comfortable, coherent environment connected to urban greenery is created.
Finale Ligure, **located on the Ligurian coast of Italy,** is a town renowned for its tourist activity, Mediterranean climate, and network of pedestrian streets where urban life mainly takes place outdoors. In this context, an urban intervention focused on creating small rest areas integrated into the city landscape has been carried out.
The intervention incorporates **ARNE chairs and FLO litter bins with cover, both belonging to the Benito Design+** range and entirely finished in olive green. Their contemporary design brings a more refined and aesthetic image to the urban space while reinforcing integration with the vegetation and natural pergolas present along the pedestrian route.
The rest areas are strategically distributed under shaded zones, creating more comfortable and peaceful spaces for residents and visitors. **The result is an intervention combining design, landscape and functionality to enhance the welcoming Mediterranean character of the environment.**

The **BENITO Design+** line is a new collection created by **BENITO** with the aim of redesigning and enhancing public spaces by combining design, functionality, and comfort. On this occasion, a project has been carried out in a green area of **Austria**, where various urban furniture elements from the Design+ range have been installed. The **ARTE benches** in red with steel structures bring a vibrant and contemporary touch to the landscape, while the **ARNE chairs** and **POLKA tables** in white and cream tones create a pleasant *chill-out* area.

These products are ideal for creating outdoor spaces for rest, gathering, and social interaction. The combination of durable materials and modern design transforms this area into a cozy, functional, and aesthetically appealing environment, reflecting BENITO's commitment to quality, innovation, and the improvement of urban spaces.
